# INTRODUCTION

**The 21X Academy 25-Day AI Cohort is designed for ambitious AI learners who want to move beyond theory and start building real AI systems.**

Artificial Intelligence is reshaping every industry, and the biggest opportunities belong to those who know how to build with it. This program is a hands-on journey where you will learn practical AI tools, automation systems, and real-world workflows used by modern creators and businesses. In just 35 days, you'll gain the skills to create AI applications, build intelligent automation, and develop a portfolio that proves your capabilities in the new AI-driven world.

# TESTIMONIALS

## Hear From Professionals Who Transformed With 21X Acamdey

"I finished my MBA with no job and joined this cohort as a last shot at something different. Within 3 weeks of completing it, I landed a consulting project with a startup to build their AI stack. This cohort literally changed my career trajectory."

**Aisha Farooqui, 25**

MBA Graduate, Fresher AI Consultant, Mumbai

Cohort 1

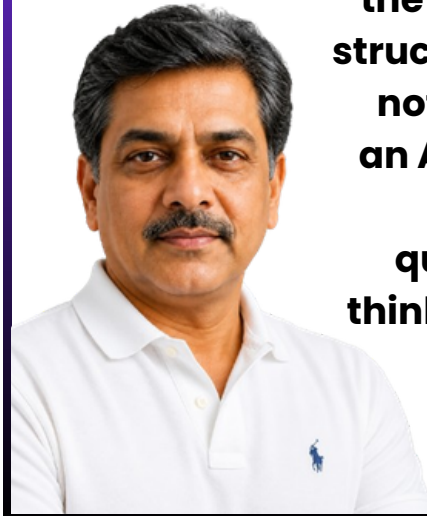

"I was the oldest in the cohort and the least 'tech' person in the room. Didn't matter. The structure was built for action, not academics. I now have an AI assistant handling my vendor follow-ups and quotation drafts. My team thinks I hired someone new."

**Rohit Sharma, 52**

Business Owner, Manufacturing, Pune

Cohort 2

"As a freelancer, I needed an edge. This gave me one. I now offer AI automation as a service to my clients and charge 3x my old rates. The cohort community alone 35 serious people in one room — is worth joining for."

**Sahil Maniyar, 29**

Freelance Consultant, Ahmedabad

Cohort 2

"I'm not technical at all. I was scared I'd be lost. But by Day 5 I was building AI agents for my content pipeline. By Day 20, I had automated 60% of my weekly reporting. This cohort changed how I work forever."

**Sneha Iyer, 31**

Marketing Head, D2C Startup, Bangalore

Cohort 2

"The Agentic AI module alone is worth the entire fee. I understood LLMs, orchestration, and tool-calling in a way no YouTube video ever explained. Got a promotion conversation started within a month of completing this. No kidding."

**Priya Nambiar, 27**

Data Analyst, Info-Tech, Hyderabad

Cohort 1

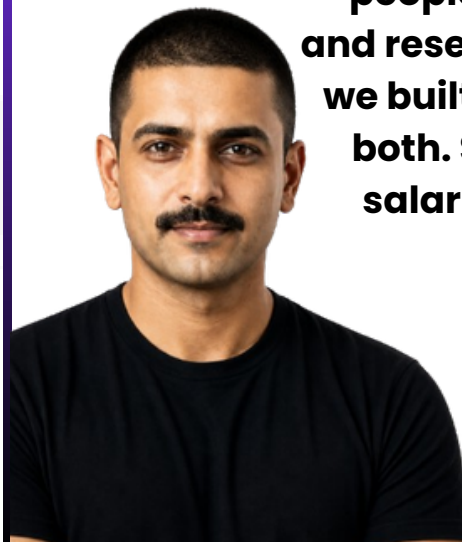

"We were about to hire 2 people for customer support and research. After this cohort, we built AI agents that handle both. Saved us ₹8L in annual salaries. The cohort paid for itself in week one of implementation."

**Karan Bajaj, 34**

Co-Founder, SaaS Startup, Delhi
